SUMMARY

Results-driven Software Engineer with expertise in AI dubbing, custom CRM architecture, and automated lead generation. Proven ability to build high-performance tools that reduce costs and improve user workflows. Passionate about scaling innovative tech solutions and streamlining complex processes.

EXPERIENCE

AI Dubbing Platform Project | Dec 2025 – Jan 2026
- Engineered an AI-driven platform achieving 95% accuracy in voice matching and emotional tone.
- Developed a processing pipeline 10x more cost-effective than industry leaders like ElevenLabs.
- Enabled seamless multilingual reach for global content creators.

Custom CRM Project | Nov 2025 – Dec 2025
- Architected a custom CRM tailored to specific client needs, focusing on workflow efficiency.
- Implemented a Web-RTC dial-in feature enabling direct lead calls from the browser.
- Increased productivity by eliminating context-switching fatigue through centralized communication.

Google Maps Scraper (Lead Generation) | Jan 2026 – Feb 2026
- Developed a targeted scraper to identify businesses globally without websites.
- Automated lead acquisition, creating a high-volume pipeline for cold outreach.

TECHNICAL SKILLS

Languages: Python, JavaScript (JS), TypeScript (TS)
Frameworks: React, SvelteKit, Node.js
Specializations: AI Voice Synthesis, Web Scraping, API Integration, Full-Stack Development
Tools: Git, CRM Architecture, Lead Generation Automation

EDUCATION

Electrotechnical Engineering | 2025 – 2031 (Expected)
USTHB, Bab Ezzouar, Algiers
Current Undergraduate Student
